

DWA_03.5 Knowledge Check_DWA3.2

1. User story(ies) in Gherkin syntax for the “+” button.

Feature: As a user I want to increment my Tally Count number by one so I can see my updated total

Scenario: User clicks the '+' button

Given: the button is visible and the number we are incrementing to is within the accepted range

When: I tap the '+' button

Then: the total I see on screen should increase by one.

Scenario: User clicks the '+' button when at the maximum allowed number

Given: the button is visible and we have reached the maximum threshold of our accepted range

When: I tap the '+' button

Then: The value should remain the same and the '+' button should be disabled

Scenario: User holds down the '+' button

Given: the button is visible and the number we are incrementing to is within the accepted range

When: I hold down the '+' button

Then: The value should only increase by one.

2. User story(ies) in Gherkin syntax for the “-” button.

Feature: As a user I want to decrement my Tally Count number by one so I can see my updated total

Scenario: User clicks the '-' button

Given: the button is visible and the number we are decrementing to is within the accepted range

When: I tap the '-' button

Then: the total I see on screen should decrease by one.

Scenario: User clicks the '-' button when at the minimum allowed number

Given: the button is visible and we have reached the minimum threshold of our accepted range

When: I tap the '-' button

Then: The value should remain the same and the '-' button should be disabled

Scenario: User holds down the '-' button

Given: the button is visible and the number we are decrementing to is within the accepted range

When: I hold down the '-' button

Then: The value should only decrease by one.
